FASTER CLEANING & COMBAT GERMS

The VTUF The RAPID VTS 1520HPC stainless-steel built pressure washer has been developed with the user to satisfy the requirements for the ideal hot pressure washer for high performance efficient cleaning on 415-volt electric supply. Performance: High flow 16 litres per minute; 3000PSI (200BAR) on 415-volt 16amp electric supply.

The RAPID VTS 1520HPC's 100% 304 STAINLESS STEEL CONSTRUCTION (chassis, cover, water tank and boiler housing) makes it one of the toughest and corrosive resistant machines. Its low center of gravity makes it a favorite for transportation.

Combat carbon technology is central to this machine's design with the clean burn and fuel-efficient boiler, as well as the anti-spill design fuel tank and handling system.

The VTUF RAPID VTS 1520HPC has a high-pressure chemical feature to give the detergent deep penetration in to dirt and grease. Hot water cleaning combined with high water flow makes tough cleaning tasks light work!

Comes standard with DPS – Digital protection System

- Delayed Auto stop (30 second delay stop motor with immediate start) – reduces wear on motor and pump
- The machine will shut down after 1 hour is not used – safety and reduced fire risk
- Low Water Cut-Out - reducing expensive damage from water shortage.
- The machine will stop if the motor overheats
- Water leak detection shut off - reducing unnecessary wear and expense.
