

V-TUF ATX2000i 110V/240V 20L M-CLASS DUST EXTRACTION VACUUM CLEANER – ATEX RATING Z22

POWER
1,1 kW

SURFACE
6.000 cm²

CAPACITY
20 Lt

HIGHLIGHTS

SUCTION UNIT

The suction unit is a powerful Brushless motor, suitable for continuous work. Two filters are installed on the head of the aspirator: one to protect the motor and the other positioned on the air outlet. The air that comes out is totally empty of carbon.

FILTER UNIT

Filtration is guaranteed by a robust polyester cartridge filter. The cartridge it was created to maintain a large filtering surface (34,000 cm²) in a compact space. This way the air can pass through too when the filter is dirty. The filter is certified in class M (BIA | EN 60335-2-69) and stops particles down to 1 micron, protecting the engines and the operator.

SEMI-AUTOMATIC AIR JET CLEANING FILTER CLEANING SYSTEM

The vacuum cleaner is equipped with a new filter cleaning system. Thanks to the different pressure between the outside and the inside of the aspirator, the system generates a flow of air which crosses the cartridge removes dust from the filter surface. It's a quick and easy way efficient to keep the filter clean while working, without stopping the aspiration.

CONTAINER

The material is collected inside a sturdy stainless steel container AISI 304 to avoid any spark that could be generated by the charge electrostatic. Thanks to the 4 sturdy swivel wheels, the container can be moved with extreme ease, and then dispose of the collected material.

SPECIFICATION

MOTOR	TYPE	BRUSHLESS
	ATEX MARKING	II 3 D EX HTC IIIB T140°C DC
	VOLTAGE	110/240V
	MAXIMUM VACUUM	230MBAR
	MAXIMUM AIR FLOW	220M3/H
PRIMARY FILTER	NOISE LEVEL	72DB(A)
	FREQUENCY	50/60HZ
MACHINE	TYPE	STAR FILTER
	CLASS EN 60335-2-69	CLASSE M
	MEDIA	ANTISTATIC POLYESTER
MACHINE	SUCTION MOUTH	50Ø MM
	DIMENSIONS	516 X 545MM
	HEIGHT	1.050MM
	WEIGHT	38KG

WHY BUY?
